

# Becoming a **GREEN** Classroom

Saving the Earth One Classroom at a Time

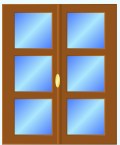

## ENERGY SAVINGS

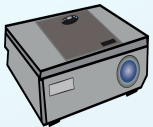

Turn OFF the lights in an unoccupied room

Unplug electronics when not in use

Close windows before leaving the classroom

Turn OFF projectors at the end of the day

## JOIN THE 5R MISSION

**REDUCE**

**REUSE**

**RECYCLE**

**RETHINK**

**REMEMBER**

## ENVIRONMENTAL EDUCATION

Take your students on an environmental field trip using the field trip directory

Incorporate environmental lesson plans into your curriculum

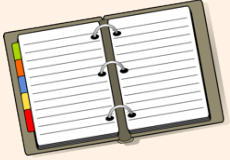

Make it FUN to learn about the environment with different activities

# STUDENT ENGAGEMENT

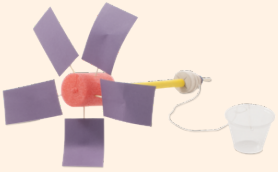

**Designate an energy saver** who is responsible for turning off the lights.

**Include a lesson plan** on renewable energy.

**Try a solar cooker project** to bring students face-to-face with the power of solar

**Create and race wind-powered toy cars** for a hands-on lesson that builds both cars and intrigue into the world of wind power.

**Conduct personal carbon footprints** and wow students with how much of an impact have on the environment.
